

## **Grow with you**

**Lakshmi**

You're biting your lip  
I see you're thinking something you don't wanna say  
Or share with me immediately  
Awaiting your words  
Not sure if I'm gonna mind  
Afraid to die  
From anything you're gonna say next

I just wanna grow  
With you  
I just wanna grow  
With you

Avoiding your eyes  
I guess I am a fool when I'm awake at night  
Slowly fading  
I envy the rain that gets to touch you every day  
Laying in the water feels so wonderful  
Going to the deep-end and sink

I just wanna grow  
With you  
I just wanna grow  
With you

When the light in you  
And you no longer hiding  
When the moon fades until the daylight sky  
When your fear no longer guides  
You are water  
You care free

I'll rise you up  
I ask the sun

I just wanna grow  
With you  
I just wanna grow  
With you  
I just wanna grow
